

Company Focus

Catskill was established as a Michigan Corporation in 1996 to specifically provide environmental construction services to industrial, commercial, and governmental clients.

Catskill exclusively provides contracting services thereby ensuring a focused approach that maximizes efficiency and cost-effectiveness on all projects.

Catskill specializes in landfill services, soil and groundwater remediation system construction, and environmental clean-up projects involving a variety of contaminants.

Catskill values good health and safety practices on its project sites. We have not had a lost time incident in over eight years and our EMR is consistently below one.

Catskill has . . .

- Experienced personnel,
- A Proven track record,
- A Results oriented approach.

We are ready to help you solve your environmental remediation problems.
