

Company Focus

Catskill was established as a Michigan Corporation in 1996 specifically and exclusively to provide environmentally related construction and contracting services designed to implement remedies designed by engineering consulting firms for industrial, commercial, and governmental clients.

Catskill exclusively provides contracting services so that a focused approach to all projects can efficiently and cost-effectively be provided.

Catskill specializes in landfill services, soil & groundwater remediation system construction, and environmental clean-up projects involving a variety of contaminants.

Catskill has the experienced personnel with a results oriented attitude to assist you with your environmental projects.
